PROJECTS

NOVEMBER 2020 - PRESENT

Protocol Digitalization — *ReactJS Developer*

TECHNOLOGY USED:

Platform : Windows
Language : ReactJS, NodeJS, ExpressJS, Python,.NET.
IDE : Visual Code Studio.
Module Bundler : Webpack

DESCRIPTION: Protocol Digitalization is an initiative with a goal of creating a digitized library for publicly available protocols.

This initiative will improve institutional knowledge and enable digital data flow for consumption into downstream business systems, tools, and workflows.

This application includes functionalities like protocol detail, section extraction, compare protocol versions, Compare protocols across studies, search, follow/unfollow protocol.

It also includes additional functionalities like quality check and admin role.

JANUARY 2020 - NOVEMBER 2020

AutoInspekt — *ReactJS Developer*

TECHNOLOGY USED

Platform : Ubuntu 18.04
Language : ReactJS, Redux, Redux, NodeJS, ExpressJS, PHP.
IDE : Visual Code Studio.
Module Bundler : Webpack

DESCRIPTION: A comprehensive, independent, unbiased inspection service to help you determine the quality of a vehicle.

The primary goal of this application is to overcome the issue of installing the application for a single inspection.

Users will be sent with a unique URL for the inspection where the user needs to validate his mobile number to start the inspection.

JANUARY 2020 - NOVEMBER 2020

AutoInspekt iOS App — *React Native Developer*

TECHNOLOGY USED:

Platform : Ubuntu 18.04
Language : React Native, PHP.
IDE : Visual Code Studio.
Module Bundler : Webpack

DESCRIPTION: Autoinspekt is a car evaluation package to help

CLIENT: IQVIA

COMPANY: Hexaware

determine the quality of the car. With Autoinspekt, get the speed of automation and the assurance of physical inspection.

Our qualified engineers take care to thoroughly inspect the vehicle across a comprehensive checklist and provide a detailed evaluation report, including vehicle history and stolen vehicle report.

MARCH 2019 - NOVEMBER 2020

Outlet Management System—*ReactJS Developer*

TECHNOLOGY USED:

Platform	: Ubuntu 18.04
Language	: ReactJS, Redux, NextJS, HTML5, CSS3
IDE	: Visual Code Studio.
Module Bundler	: Webpack

DESCRIPTION: OMS is a dealer facing web application where the dealer manages all kinds of information regarding stocks, leads, offers and customer complaints.

Here the dealer can add or edit its stocks which will be displayed on the customer portal and can see its stock leads come from the customer portal. Also dealers can add their private leads when customers come directly to him.

This application has two kinds of users like dealers and area managers. Area managers can check dealer performance and manage dealers. OMS also has a dealer facing Instant Cash Offer portal where dealers will recheck all the information given by the user and generate a final price. If the user agrees to that, then the dealer closes the deal.

AUGUST 2018 - NOVEMBER 2020

MFC-Website—*ReactJS Developer*

DESCRIPTION: Mahindra First Choice is a customer facing application for those who are interested in buying or selling pre-owned cars. If a customer is interested in buying a used car, they can see details and specifications of a list of available used cars in their city. They can also get dealer information by submitting their details.

JANUARY 2018 - JUNE 2018

Oxygen Global GMCabs —*React Developer*

DESCRIPTION: This application was for GMCabs drivers who are assigned with an oxygen card for their everyday transaction credit.

This application facilitates functionalities like activate card, balance check, balance transfer, Coupons etc.

Developed wireframes and task flows based on user's needs.

Created a very intuitive, user-friendly User Interface.

CLIENT: Mahindra First Choice

ROLES and RESPONSIBILITIES:

Requirement analysis and development.

Participates in technical discussions related to new functionality, products and framework.

Developed wireframes and task flows based on user's needs.

Created a very intuitive, user-friendly User Interface.

CLIENT: Mahindra First Choice
